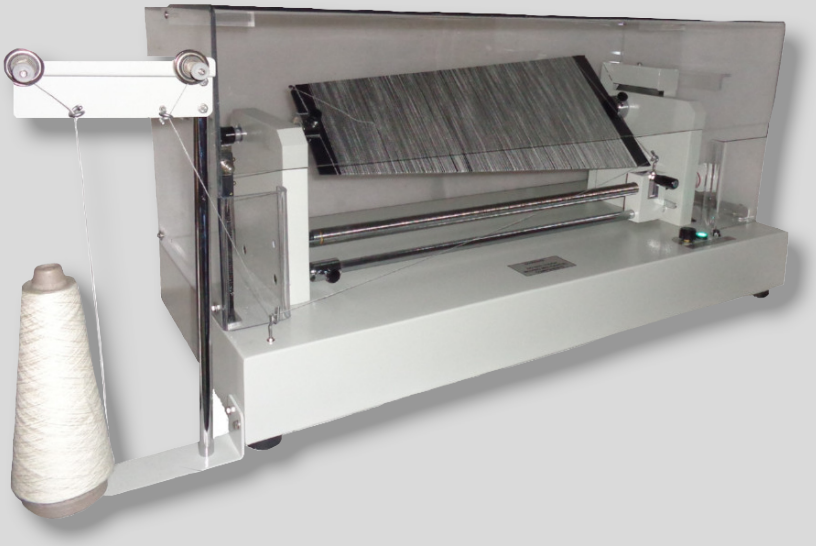
WIRA INSTRUMENTATION

Board Winder



To assess yarn evenness in compliance to ASTM standards

Fast and accurate results.

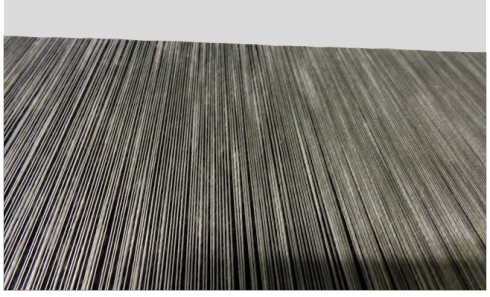
Single–traverse board winder for yarn inspection and sample viewing, used to detect irregularities in the yarn.

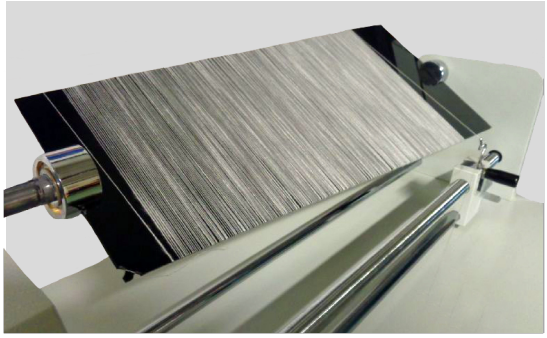
Can accommodate either tapered (155 x 255 x 600 mm) or rectangular boards (255 x 600 mm).

A special pretension device ensures constant tension of the yarn as winds on the cards and the yarn pitch is selected by a pulley system.

Key Features

- ✔ *Variable Speed, 30-300 rpm*
- ✔ *Automatic stop*
- ✔ *Pretension device*
- ✔ *Bracket to hold bobbins*





Dimensions: 950mm (W), 360mm (D), 600mm (H)
Power Requirements: 0.1 kW
Conforms to: ASTM D2255.

Order Code: BWD:001
