

- The original WIRA Fibre Fineness Meter has gained wide popularity and acceptance, and is in use in quality control laboratories and test rooms worldwide
- Average fibre diameter in a few minutes
- IWTO standard method of test.
- Operates on the well-known air-flow principle
- The instrument can also be calibrated for cotton, to give a direct reading of micronaire
- Includes air pump and non-hygroscopic calibration plug

Dimensions:

Width: 240mm

Depth: 330mm

Height: 580mm

Power Consumption: 250W

Also Available:

- Order code **FFM:MCM**
Hand held microcomputer for recording and Analysis of results
- Order code **FFM:THM**
Digital temperature and humidity meter
- Order code **FFM:REF**
Interwoollabs IH Standards for fineness calibration purposes
