

Test kits are available for a number of absorption tests of various standards including the following:

Liquid Absorbency Tester Kit

Order Code LAT:001

The sample is immersed in water and the time required for complete wetting is recorded.

The test kit includes the wire basket and containing vessel.

Standards: Edana 10.3-99, ISO 9073-6, IST 10.1(95)

Liquid Absorptive Capacity Tester Kit

Order Code LAC:001

This method looks at the amount of liquid a specimen can hold after a period of immersion and drainage.

ing glass with cover. A balance and timer are also available.

The test kit includes specimen support frame, dish and weigh-

Please specify if you require the INDA kit. Order Reference: **LAC:002**

Standards: Edana 10.3-99, ISO 9073-6, IST 10.1 (95)

Liquid Wicking Rate Tester Kit

Order Code LWR:001

The test sample is suspended in test liquid and the rate of absorption of the liquid up the sample is recorded during a set time period.

The test kit includes support frame, fabric clamp, scale, glass rods and dish.

Please specify if you require the INDA kit. Order Reference: **LWR:002**

Standards: Edana 10.3-99, ISO 9073-6, IST 10.1 (95)
