

- Specially programmed for yarn count testing
- Printed Results
- Convenient and easy to use

The Wira Yarn Count Balance is the ideal device for the analytical testing of yarn count.

Readings can be taken in a variety of standard yarn count systems and the data printed directly.

A series of tests are carried out and results stored.

Values are printed including indication of values that are out of tolerance

Specification:

Capacity: 220g

Accuracy: 0.001g

Count Systems include: Tex,

Den, Nm, Ne_c, dTex, Ne_p, Ne_w

Sample Units: Meters, Yards, cm²

Statistical Data: Average, max,

min, CV%, Standard Deviation

Power Supply: 220v -50/60Hz

Dimensions: 450x280x110

Weight: Approx 4kg

Accessories:

*Printer: Order Code **YCB:PRT***

Paper for printer: Order Code

YCB:PPR

*Printer Ribbon: Order Code **YCB:***
