

Test kits are available for a number of absorption tests of various standards including the following:

Nonwovens Absorption

Liquid Absorbency Tester Kit

The sample is immersed in water and the time required for complete wetting is recorded. The test kit includes the wire basket, steel ruler and container for the water.

Standards: Edana 10.3-99, ISO 9073-6, IST 10.1(95)

Order Code: LAT:001

Liquid Absorptive Capacity Tester Kit

This method looks at the amount of liquid a specimen can hold after a period of immersion and drainage.

The test kit includes specimen support frame, dish and weighing glass with cover. A balance and timer are also available.

Please specify if you require the INDA kit. Order reference: LAC:002

Standards: Edana 10.3-99, ISO 9073-6, IST 10.1(95)

Order Code: LAC:001

Liquid Wicking Rate Tester Kit

(As pictured above) The test sample is suspended in test liquid and the rate of absorption of the liquid up the sample is recorded during a set time period. The test kit includes support frame, fabric clamp, scale, glass rods and dish. Please specify if you require the INDA kit. Order reference: LWR:002

Standards: Edana 10.3-99, ISO 9073-6, IST 10.1(95)

Order Code: LWR:001
