

To assess yarn evenness in compliance to ASTM standards

Fast and accurate results.

Single-traverse board winder for yarn inspection and sample viewing, used to detect irregularities in the yarn.

Can accommodate either tapered (155 x 255 x 600 mm) or rectangular boards (255 x 600 mm).

A special pretension device ensures constant tension of the yarn as winds on the cards and the yarn pitch is selected by a pulley system.

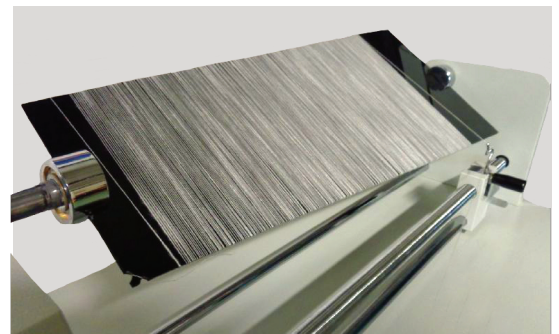

Dimensions: 950mm (W), 360mm (D), 600mm (H)

Power Requirements: 0.1 kW

Conforms to: ASTM D2255

Key Features

- ✓ *Variable Speed, 30-300 rpm*
- ✓ *Automatic stop*
- ✓ *Pretension device*
- ✓ *Bracket to hold bobbins*

Order Code: BWD:001
