

## Easily measure carpet pile thickness with convenient Wira apparatus

Set of steel measurement gauges for manually checking carpet pile thickness.

### Test Method

The flat stainless steel gauges are inserted into the pile. By using successive gauges, the gauge nearest the pile length can be determined.

The measuring range is 3 to 25mm in 1mm steps.

### Key Features

- ✓ *Quick and easy to use*
- ✓ *Provides instant readings*
- ✓ *Can be used in the lab or in production facility*
- ✓ *No power required*

Conforms to: Wools of New Zealand  
Test method: ISO 2549:1972

Order Code: WNZ:GGS
