

An important tool for spot checks

Suitable for manufacturing and educational purposes.

The Wira Linen Tester is a convenient tool for inspecting the quality of woven fabrics and measuring the number of weft and warp threads.

The Linen Tester is manufactured with high-definition biconvex glass lens for better performance. This allows fabrics to be clearly inspected.

Brass, chrome-plated casing ensures durability. The mount has a matte finish. A carry case can be ordered as an accessory.

Lens Material: Optically round silicate glass.

Lens Size: approx. 1.5cm

Key Features

- ✓ *Easy and effective inspection tool*
- ✓ *High quality lens*
- ✓ *Available in a variety of sizes*
- ✓ *Durable housing*
- ✓ *Light and portable*
